CLAIM AMENDMENTS

Claim 1 (currently amended) A liquid cleaning composition for a textile substrate consisting essentially of:

- (a) from about 2.0 to about 75 parts by weight of at least one absorbent particulate ~~present in an amount not more than about 75 parts by weight~~, said absorbent particulate being selected from the group consisting of a urea formaldehyde polymeric material, polyurethane, polystyrene, phenol-formaldehyde resin particles, ~~water insoluble inorganic salt~~ adjuvants, cellulosic particles, diatomaceous earth particles, wood particles, particles made from grains and other vegetable matter, cellulosic particles, ~~inorganic particles~~ and mixtures thereof, wherein said absorbent particulate has an average particle size of from about 10 to about 300 microns in diameter and an oil absorption value of at least 40;
- (b) at least 35 parts water, wherein said water contains a surfactant sufficient to provide a surface tension of less than about 40 dynes per centimeter; ~~and~~
- (c) from about 0.01 to about 50 parts by weight of a dispersion stabilizing agent selected from the group consisting of air, cellulosic polymers, starches, clay compounds, xanthan gums, polyacrylic acids and esters, polyacrylamide, polyvinyl alcohol and mixtures thereof, wherein said dispersion stabilizing agent is present in an amount sufficient to produce a stable or easily redispersed dispersion; and
- (d) at least one compound selected from the group consisting of an organic liquid, an acrylic stain resist agent, a pH adjuster, a biocide, an aerosol propellant, a static reducing additive, a dust suppressing additive, a vacuum retrieval additive, a metal ion chelator, and a fragrance.

Claim 2 (original) The liquid cleaning composition of claim 1, wherein said average particle size of said absorbent particulate is from about 10 to about 200 microns.

Claim 3 (original) The liquid cleaning composition of claim 1, wherein said average particle size of said absorbent particulate is from about 10 to about 105 microns.

U.S. PTO Customer No. 25280

Case #5719

Claim 4 (original) The liquid cleaning composition of claim 1, wherein said average particle size of said absorbent particulate is from about 35 to about 105 microns.

Claim 5 (original) The liquid cleaning composition of claim 1, wherein said absorbent particulate is urea formaldehyde polymeric material.

Claims 6 - 7 (cancelled)

Claim 8 (original) The liquid cleaning composition of claim 1, wherein said liquid cleaning composition comprises at least 50 parts water.

Claim 9 (original) The liquid cleaning composition of claim 1, wherein said liquid cleaning composition comprises at least 75 parts water.

Claim 10 (original) The liquid cleaning composition of claim 1, wherein said surfactant is selected from the group consisting of nonionic surfactants, anionic surfactants, cationic surfactants, and combinations thereof.

Claim 11 (original) The liquid cleaning composition of claim 10, wherein said surfactant is a nonionic surfactant, and wherein said nonionic surfactant has the formula:

where n is 0 or 1, m is 3 to 20, R¹ is OH or OCH₃, R is C₁₂ to C₂₂ alkyl or phenyl or naphthyl optionally substituted by C₁ to C₁₀ alkyl groups.

Claim 12 (original) The liquid cleaning composition of claim 10, wherein said surfactant is an anionic surfactant, and wherein said anionic surfactant is a long chain alcohol sulfate ester or an alkylene oxide additive of C₆-C₁₀ mono and diesters of ortho-phosphoric acid.

Claim 13 (cancelled)

U.S. PTO Customer No. 25280

Case #5719

Claim 14 (currently amended) The liquid cleaning composition of claim 43 1, wherein said organic liquid is selected from the group consisting of C₁ to C₄ aliphatic alcohols, high boiling hydrocarbon solvents and mixtures thereof.

Claim 15 (original) The liquid cleaning composition of claim 14, wherein said organic liquid is a high boiling hydrocarbon solvent.

Claims 16 - 17 (cancelled)

Claim 18 (currently amended) The liquid cleaning composition of claim 47 1, wherein said biocide is selected from the group consisting of potassium sorbate, an isothiazolone compound and mixtures thereof.

Claim 19 (cancelled)

Claim 20 (original) The liquid cleaning composition of claim 1, wherein said aerosol propellant is selected from the group consisting of propane, butane, carbon dioxide and mixtures thereof.

Claim 21 (cancelled)

Claim 22 (currently amended) The liquid cleaning of claim 24 1, wherein said static reducing additive is aluminum silicate clay.

Claim 23 (cancelled)

Claim 24 (currently amended) The liquid cleaning composition of claim 23 1, wherein said dust suppressing additive is selected from the group consisting of polyoxyalkylene materials, non-volatile organic solvents, and mixtures thereof.

Claim 25 (original) The liquid cleaning composition of claim 24, wherein said dust suppressing additive is dipropylene glycol.

Claim 25 (second instance – cancelled)

U.S. PTO Customer No. 25280

Case #5719

Claim 26 (cancelled)

Claim 27 (currently amended) The liquid cleaning composition of claim 26 1, wherein said vacuum retrieval additive is selected from the group consisting of polyoxyalkylene materials, aluminum silicate clay, hydrolyzed styrene maleic anhydride, and mixtures thereof.

Claim 28 – 30 (cancelled)

Claim 31 (currently amended) A liquid cleaning composition for a textile substrate consisting comprised of:

- (a) from about 2.0 to about 75 parts by weight of at least one absorbent particulate ~~present in an amount not more than about 75 parts by weight~~, said absorbent particulate being selected from the group consisting of a urea formaldehyde polymeric material, polyurethane, polystyrene, phenol-formaldehyde resin particles, ~~water insoluble inorganic salt adjuvants~~, cellulosic particles, diatomaceous earth particles, wood particles, particles made from grains and other vegetable matter, cellulosic particles, ~~inorganic particles~~ and mixtures thereof, wherein said absorbent particulate has an average particle size of from about 10 to about 300 microns in diameter and an oil absorption value of at least 40;
- (b) at least 35 parts water, wherein said water contains a surfactant sufficient to provide a surface tension of less than about 40 dynes per centimeter;
- (c) from about 0.01 to about 50 parts by weight of a dispersion stabilizing agent selected from the group consisting of air, cellulosic polymers, starches, clay compounds, xanthan gums, polyacrylic acids and esters, polyacrylamide, polyvinyl alcohol and mixtures thereof, wherein said dispersion stabilizing agent is present in an amount sufficient to produce a stable or easily redispersed dispersion; and
- (d) from about 0.01 to about 50 parts by weight of a vacuum retrieval additive selected from the group consisting of polyoxyalkylene materials, aluminum silicate clay, hydrolyzed styrene maleic anhydride, and mixtures thereof.

Claims 32 – 33 (cancelled)

U.S. PTO Customer No. 25280

Case #5719

Claim 34 (currently amended) A liquid cleaning composition for a textile substrate consisting comprised of:

- (a) from about 2.0 to about 75 parts by weight of at least one absorbent particulate ~~present in an amount not more than about 75 parts by weight~~, said absorbent particulate being selected from the group consisting of a urea formaldehyde polymeric material, polyurethane, polystyrene, phenol-formaldehyde resin particles, ~~water insoluble inorganic salt adjuvants~~, cellulosic particles, diatomaceous earth particles, wood particles, particles made from grains and other vegetable matter, cellulosic particles, ~~inorganic particles~~ and mixtures thereof, wherein said absorbent particulate has an average particle size of from about 10 to about 300 microns in diameter and an oil absorption value of at least 40;
- (b) at least 35 parts water, wherein said water contains a surfactant sufficient to provide a surface tension of less than about 40 dynes per centimeter;
- (c) from about 0.01 to about 50 parts by weight of a dispersion stabilizing agent selected from the group consisting of air, cellulosic polymers, starches, clay compounds, xanthan gums, polyacrylic acids and esters, polyacrylamide, polyvinyl alcohol and mixtures thereof, wherein said dispersion stabilizing agent is present in an amount sufficient to produce a stable or easily redispersed dispersion;
- (d) from about 0.01 to about 50 parts by weight of a vacuum retrieval additive selected from the group consisting of polyoxyalkylene materials, aluminum silicate clay, hydrolyzed styrene maleic anhydride, and mixtures thereof; and
- (e) from about 0.01 to about 50 parts by weight of an organic liquid selected from the group consisting of C₁ to C₄ aliphatic alcohols, high boiling hydrocarbon solvents, and mixtures thereof.

Claims 35 – 36 (cancelled)

U.S. PTO Customer No. 25280

Case #5719

Claim 37 (currently amended) A liquid cleaning composition for a textile substrate consisting comprised of:

- (a) from about 2.0 to about 75 parts by weight of at least one absorbent particulate present in an amount not more than about 75 parts by weight, said absorbent particulate being selected from the group consisting of a urea formaldehyde polymeric material, polyurethane, polystyrene, phenol-formaldehyde resin particles, ~~water insoluble inorganic salt adjuvants~~, cellulosic particles, diatomaceous earth particles, wood particles, particles made from grains and other vegetable matter, cellulosic particles, ~~inorganic particles~~ and mixtures thereof, wherein said absorbent particulate has an average particle size of from about 10 to about 300 microns in diameter and an oil absorption value of at least 40;
- (b) at least 35 parts water, wherein said water contains a surfactant sufficient to provide a surface tension of less than about 40 dynes per centimeter; and
- (c) from about 0.01 to about 50 parts by weight of a dispersion stabilizing agent selected from the group consisting of air, cellulosic polymers, starches, clay compounds, xanthan gums, polyacrylic acids and esters, polyacrylamide, polyvinyl alcohol and mixtures thereof, wherein said dispersion stabilizing agent is present in an amount sufficient to produce a stable or easily redispersed dispersion; and
- (d) from about 0.01 to about 50 parts by weight of an acrylic stain resist agent.

Claim 38 (previously presented) The liquid cleaning composition of claim 24, wherein said dust suppressing additive is mineral oil.
